About me:

I am a responsible, purposeful and motivated person who adjusts quickly to the new environment. Such qualities as sociability and flexibility make me a good team player. I am highly organized and detail-oriented, which is vital for a QA engineer. I also have extensive experience with 1C. In my free time I do crowdtesting websites on uTest platform.

If you choose me for position as QA engineer your company will get man with English intermediate level, stress-resistance, multitask and problem-solving abilities.

Best regards and thank you for your consideration!
